US-ASEAN CONNECT
partnering for sustainable and innovative economic growth

DIGITAL ECONOMY SERIES

The Digital Economy Series is an ongoing series of roundtables and workshops to promote best practices for developing policy and regulatory ecosystems for a thriving digital economy. Through the Digital Economy Series, U.S.-ASEAN Connect brings together key ASEAN government decision makers with leading U.S. and regional technology companies to share best practices and expertise, discuss opportunities for U.S. companies to contribute to the growth of the digital sector, and facilitate a more open and innovative environment in which both local and American small and medium enterprises can thrive in the evolving digital economy space.
